

Projectors

H7 Series

This chic white series of projectors gives you Full HD 1080p widescreen cinematic enjoyment with images in living color! Enhanced color technologies, ultra-high dynamic contrast ratio and HDMI® connectivity effortlessly deliver brilliant games and entertainment right in the comfort of your living room.

Enhanced color technologies

Acer ColorBoost II+ and Acer ColorSafe technology¹ work together to present richer details, smoother gradation, and brighter natural colors, while preserving the color integrity of your images. Wall-color compensation lets you project accurate images on colored walls, so you're not limited to a white background.

Keeping images alive

The ultra-high dynamic contrast ratio means superior black levels while maintaining the original luminance of bright scenes for optimized imagery. What's more, images are portrayed vividly even in brightly lit living rooms thanks to a high-intensity lamp.

Complete digital connectivity

HDMI® connectivity offers quick, high-definition fun from game consoles, media players, or computers. HDMI® delivers exceptional high-definition viewing and provides the highest-quality video and audio currently available via a single cable connection.

Smart signal detection¹

Acer Smart Detection automatically detects which source input is plugged in; no need to cycle through a long list of input sources. In the event of multiple sources, Acer Smart Detection remembers what input source is frequently used and automatically switches to that source.

H7531D
